State Contract # 986739 Goldstrike Reclamation and Monitoring

Correspondence with BLM and DWR

Doug, I went out to the mine site today. The rain gauge at the East Hamburg Pit showed 1.05 inches of rain.

11/18

The heap off-flow was down to about 1.5 GPM. The East Fork is dry.

I didn't cover as much of the area today as I had to take water samples and get them to UPS. I sent you a copy of the UPS shipping form. (E-mail)

I will burn the tumble weeds in the winter months after we get some more rain. I saw deer tracks in the land application area for the first time in three years. There was no sign of Chukers or Turkeys on the mine property.

There are still cows on the site. I counted 8 around basin pit. The water was very clear coming out of the effluent pipe. I put your phone number on the chain of custody form and put UDOGM address for billing with the PO # you gave me. I told them not to exceed \$ 500.00 and to contact you before they started analysis.

I'll check all the gates and side roads next month. If it's not too dry I'll burn weeds.

That's all for this month-

Dan Slyter
